The "Elixir of Calisaya Bark"—

was introduced to the notice of the Faculty in 1830, by *J. Milhau, the sole Inventor.* None of those numerous firms were in existence, who, rather than give a new name to a new article, have found it more convenient within a few years to appropriate the above extensively known title; it is therefore presumable that physicians in prescribing, as for over thirty years, have reference solely to the *original article* made by J. MILHAU & SON.

Also, the CHALYBEATE ELIXIR OF CALISAYA BARK (copyrighted), being the above preparation with the addition of two grains of the celebrated *Pyrophosphate of Iron* to each wineglassful.

DIGESTIVE ELIXIR OF PEPSINE GRIMAULT & C° CHEMISTS, PARIS

Pepsine, which is a happy discovery of Dr. Corvisart, physician to the Emperor of the French, is sanctioned by the approbation of the Paris Academy of Medicine. The name and authority of its inventor recommend it to all physicians. It possesses the property of operating digestion of and without fatigue to the stomach and intestines; under its influence fooddigestion, nausea, pituite, eructations, inflammation of the stomach bad bowels, cease as by magic; the most rebellious gastritis and gastralgia are rapidly modified, and megrims, sick headaches, the result of bad digestion, disappear instantly. Ladies will be happy to learn that this delicious liquor prevents vomiting during pregnancy; old men and invalids will find in it the restoring food of the stomach, and a preservation of life and health.

SOLUBLE PHOSPHATE OF IRON BY LERAS, M.D. DOCTEUR ÈS SCIENCES GRIMAULT & C° CHEMISTS, PARIS

Three distinct preparations: Solution, Syrup, and Confits. No ferruginous medicament as remarkable as the soluble phosphate of iron and soda does exist, so that the most renowned medical men of the whole world have adopted it with an eagerness not equalled in the chronicles of science. Pale color, anæmia, difficult convalescence, fluor albus, and irregularity in menstruation, the critical age in ladies, pernicious fevers, poorness of the blood, lymphatic constitutions, are rapidly cured or modified by this excellent preparation, acknowledged to be the best preserver of health, a sure preservative against epidemical diseases, and declared in all hospitals and academies superior to iodide and citrate of iron, and to all other known ferruginous compounds.

NO MORE COD LIVER OIL! SIRUP OF IODIZED HORSE RADISH GRIMAULT & C° CHEMISTS, PARIS

The most powerful vegetable depurative known, the most remarkable modifier of humors, and the best succedaneum of cod liver oil, is in the opinion of the whole medical profession the Iodated Syrup of Horse-Radish. Ask for the prospectus of this excellent medicine; you will find in it the most honorable recommendations of the best Doctors of Paris. By its use you may be certain to cure or modify the gravest affections of the chest, to destroy in your children, even the youngest and the weakest, the germ of scrofulous affections; the obstructions of the glands will disappear, paleness, flabbiness of the flesh, and weakness of constitution will give way to health, vigor, and appetite. Grown persons, having a defect or acridity in the blood, a disease of the skin, ulcers a rising from inheritance or the direful consequences of secret diseases, will rapidly obtain a quick relief, for there is no Rob nor Sarsaparilla which can compete with the vegetable combination of the Iodated Syrup of Horse-Radish.

BETTER THAN COPAIBA!! VEGETABLE MATICO INJECTION AND CAPSULES GRIMAULT & C° CHEMISTS, PARIS

This new remedy is prepared from the leaves of the Matico, a tree of Peru, for the prompt and infallible cure of gonorrhœa, leucorrhœa, fluor albus, diseases of the bladder, without fear of stricture of the urethra or inflammation of the bowels. The celebrated Doctor Ricord, of Paris, ceased to prescribe all other medicaments as soon as Matico was discovered. The injection is used at the commencement of the discharge; the capsules in chronic and inveterate cases which have resisted the preparations of copaiba, cubebs, and injections of a metallic base.

Also soluble vaginal capsules of a proper form and size, designed to carry and maintain in the womb and on the neck, either Matico or other medicines, which injections can only depose temporarily.

THE

NERVOUS AND VASCULAR CONNEXION

BETWEEN THE

MOTHER AND FŒTUS IN UTERO.

By JOHN O'REILLY, M.D., F.R.C.S.I.

BAILLIERE BROS., 520 Broadway. WOOD, 61 Walker St., N.Y.

NOTICES.

"He has handled the subject ably and most scientifically."—*Professor Mott's Surgical Lectures, N. Y. University, Feb.* 1864.

"In fact the subject should have been written upon long ere this, and as it is, the profession are under a deep debt of gratitude to Dr. O'Reilly for having afforded them a key to unlock the mysteries of nature."—*Prof. Budd's Lectures on Obstetrics, N. Y. University, Feb.* 1864.

"You have opened up a field of observation which cannot fail, in your hands, to lead to most important results."—*William A. Hammond, Surgeon-General, U.S.A.*

"The author's views are clearly stated, his arguments, if not demonstrative, are at least ingenious, his conclusions logical, and will well repay the time devoted to their study."—*Chicago Medical Journal.*

"This work consists of an ingenious argument to show that there is a nervous connexion between the Mother and Fœtus in Utero. Facts illustrative and demonstrative are introduced, and the philosophy of mental impressions being conveyed to the Fœtus in Utero by the mother is presented according to the original and enlightened views of the author. It is impossible to give our readers any very satisfactory resumé of the arguments presented, or the opinions entertained by Dr. O'Reilly. He has studied this subject with great care, and is explaining facts which have been hitherto stupidly denied, because they could not be satisfactorily explained. Physicians who deny that mental impressions made upon the mother can be conveyed to the fœtus in utero, are especially invited to read this book; they will see that there are '*some stranger things than dreampt of in their philosophy.*' We have been deeply interested in the perusal of the book, and though perhaps all the positions are not yet fully established, yet the originality, philosophy, and perspicuity of the work commend it to the careful consideration of all."—*Buffalo Medical and Surgical Journal.*

"The quotation from St. Luke is very adroit, in fact it is sublimely apropos; it is worth whole volumes of demonstrative material from other sources."—*John Shanks, M.D., New York.*

"With his characteristic originality and ingenuity, Dr. O'Reilly labors to prove that there is a nervous connexion by which impressions are conveyed from the mother to the fœtus in utero, a doctrine hitherto ignored by a large portion of the medical profession. . . . . Yet however sceptical we may be on this point, we have been deeply interested in the perusal of the book, and commend it to the consideration of our readers."—*American Medical Times, N. Y.*

"It would be useless in our limited space to attempt to make any argument for or against the theory broached herein; still less to express a bold opinion respecting the correctness or the contrary of the deductions made by the erudite author. But we should do great wrong did we not recognise the research, industry, and originality so evident in its pages, and without expressing an opinion upon this questio vexata, to acknowledge the valuable facts collected and the bold reasoning upon them."—*New York Medical Independent.*

To the Medical Profession.—Dr. J. PARIGOT, late Commissioner in Lunacy, and Honorary Professor of the University of Brussels, offers to consult with Gentlemen of the Profession, and to give advice on Mental Disorders and Medico-Legal Cases.

DR. PARIGOT has a vacancy for a patient at his residence.
